NASA/MARSHALL SPACE FLIGHT CENTER
SOFTWARE USAGE AGREEMENT

Per your request, the National Aeronautics and Space Administration (NASA) Marshall Space Flight Center agrees to provide the TreK Version x.x software code(s) and related documentation (SOFTWARE), subject to the following restrictions and conditions. This Agreement constitutes a non-exclusive license for use of the provided SOFTWARE by RECIPIENT. The provided SOFTWARE is and shall remain the intellectual property of NASA. NASA makes no representations as to the suitability of the SOFTWARE for the intended or any other use.

1. There shall be no further distribution or publication by RECIPIENT of the provided SOFTWARE, neither the source code, nor the executable code, nor associated run-time applications, whether standalone or embedded, for use by any third party without the express prior written approval of the NASA Marshall Space Flight Center. Notwithstanding the preceding provisions, the obligations of RECIPIENT regarding the further distribution of the provided SOFTWARE shall not apply to:

   a. Information that, at the time of provision to RECIPIENT, was published, known publicly or otherwise in the public domain;

   b. Information that, after provision to RECIPIENT, is published by NASA, or becomes publicly known, or otherwise becomes part of the public domain through no fault of RECIPIENT

   c. Information that, prior to the time of provision by NASA to RECIPIENT, is known to RECIPIENT as evidenced by its written records;

   d. Information which, after provision by NASA to RECIPIENT, is made available to RECIPIENT in good faith by a third party under no obligation of confidentiality.

2. The provided SOFTWARE, and/or any modified version thereof, shall not be published by RECIPIENT for profit to, nor in any manner offered for sale to, the U.S. government. The SOFTWARE as provided shall not be sold to any other entity or firm, without the prior written approval of the NASA Marshall Space Flight Center. If the SOFTWARE is modified or enhanced using U.S. government funds, the U.S. government owns the results, whether the resulting product(s) is (are) the basis of, or incidental to, a U.S. government contract. The U.S. government shall not pay a second time for the SOFTWARE or any enhanced/modified version thereof. The SOFTWARE may be used in contract with the U.S. government, but no charge may be made for its use.

3. The provided SOFTWARE is intended for domestic United States of America use only, and shall not be made available to any foreign national person or entity, whether inside or outside of the United States of America. RECIPIENT is not permitted to lend, sell, lease, or in any way make available, the provided SOFTWARE, in whole or in part, to any foreign entity without the express written prior approval of the NASA Marshall Space Flight Center. Unless explicitly stated otherwise by the NASA Marshall Space Flight Center Export Administrator or delegated Representative, all provided SOFTWARE and related run-time applications are deemed United States of America export controlled. If the provided SOFTWARE is deemed to have no export restrictions, then an amendment to this Use Agreement, identifying said software and/or documentation items, will be drafted and supplied with delivery of said items.

4. The NASA Marshall Space Flight Center shall be neither liable nor responsible for any maintenance or updating of the provided SOFTWARE, nor for correction of any errors in the SOFTWARE. NASA shall not be liable for any use or disposition of the SOFTWARE by RECIPIENT.

5. NASA shall not be limited in future claims, publications, or distributions of the provided SOFTWARE, or related information, whether for the provided SOFTWARE, or for modifications or versions thereof.

6. This SOFTWARE is provided "as is" without any warranty of any kind, either express, implied, or statutory, including, but not limited to, any warranty that the SOFTWARE will conform to specifications, any implied warranties of merchantability, fitness for a particular purpose and freedom from infringement, or any warranty that the documentation will conform to the program, or any warranty that the SOFTWARE will be error free. In no event shall NASA be liable for any damages, including, but not limited to direct, indirect, special or consequential damages, arising out of, resulting from, or in any way connected with the performance or breach of this license, whether or not based upon warranty, contract, tort or otherwise, whether or not injury was sustained by persons or property or otherwise, and whether or not loss was sustained from, or arose out of the results of, or use of, the SOFTWARE or services provided hereunder. RECIPIENT agrees to waive any and all claims against the U.S. government, the U.S. government's contractors and subcontractors, and shall indemnify and hold harmless the U.S. government and the U.S. government's contractors and subcontractors for any damage that RECIPIENT may incur from RECIPIENT's prior or future use of the provided SOFTWARE, including any damages resulting from products based on results from the use thereof. RECIPIENT agrees to obtain this identical waiver of claims, indemnification and hold harmless agreement with any entities that are provided with technical data derived from the use of the SOFTWARE.

7. This Agreement does not constitute NASA's endorsement of any test results, resulting designs, hardware, or other matters resulting from the use of the provided SOFTWARE.

8. The provision of SOFTWARE herein to RECIPIENT shall not result in any right or license under any patent or patent application owned by NASA.

9. No copyright to the provided SOFTWARE is claimed in the United States under Title 17, U.S. Code.

10. This Agreement constitutes the entire understanding and agreement between the parties hereto relating to the provision of the subject SOFTWARE and may not be superseded, modified or amended except by further written agreement duly executed by the parties.

11. The effective date of this Agreement shall be the date on which this software is downloaded to your system.
